

Psychological Counselling

at Wijnland Fertility Clinic

The human capacity to love is the greatest force for good on Earth, and the love of a parent for their child one of the most universally recognized expressions of unconditional love across all cultures. To be denied this possibility is devastating, and a huge obstacle to overcome. This is true whether the denial is through the loss of a child, a miscarriage, termination or the inability to conceive in the first place.” – Caroline Gallup, 2007

Why Seek Support?

To talk about the following issues:
